

Local CCSS Standards & Instructional Objectives Plus Curriculum Map!

Creating the Guaranteed, Viable Curriculum

At partners4results, we work with your staff to provide training and internet-based software that follows the national research of Reeves, Ainsworth, Schmoker, and others to improve student performance.

This process and software provides the district:

- ➔ Local expertise in standards and assessments mapped to the CCSS
- ➔ Local staff buy-in to the new curriculum documents aligned to CCSS
- ➔ Local consensus on the real curriculum—all electronically mapped/aligned to the CCSS
- ➔ Internet-based, electronic capabilities for creating, editing, storing, and publishing all curriculum documents
- ➔ Accessible 24-7 by the entire educational community

Also Includes Complete Curriculum Mapping capabilities!

- Automatically and electronically maps your intended curriculum and assessments available
- Allows staff use to identify suggested resources, Academic Vocabulary, and any other construct you deem important
- Creates historical documents of things that work for future, shared use

Selection	PS Element No	IO No	Instructional Objective	Resources/Tools	Academic Vocabulary
	1	Algebra 1-01.1	Rewrite and simplify terms using the distributive property.		Testing partners4results Add Date: 07/20/2011

Easily add academic vocabulary, resources and tools!

Our Mission:

We partner with districts to improve student performance through curriculum and assessment alignment, national research, personal relationships, world-class technology and support.
