

Partners4results training and internet-based software empowers local staff to create, edit, publish, and store locally created assessments. These assessments are electronically mapped to the Local CCSS Standards and Instructional Objectives, thus ensuring the curriculum is aligned while providing feedback to drive instruction.

This training and software allows the local district:

- ➔ Internet-based ability to create, edit, store, and publish all local assessments
- ➔ Ability to apply this software and its analytics to local state, and national assessments to generate a more in depth analysis of these scores and curriculum alignment issues.
- ➔ Local scanning with internet-based scoring and immediate data analysis— Real-Time Data
- ➔ Item Analysis, Instructional Objective analysis, and classroom comparison analysis.

p4r software allows you to easily create and administer a variety of assessment types including multiple choice, open response, rubrics, and custom bubble sheets suitable for almost any age group.

Question Number	Correct Answer	Number Correct This Section	Percent Correct This Section	Percent Correct Teacher	Number Of Classes Teacher	Percent Correct Course Team	Number Of Classes Course Team
1	C	33	80.5%	80.5%	2	72.0%	7
2	F	33	80.5%	80.5%	2	70.1%	7
3	A	35	85.4%	85.4%	2	75.0%	7
4	J	32	78.0%	78.0%	2	75.0%	7
5	A	31	75.6%	75.6%	2	75.0%	7
6	J	30	73.2%	73.2%	2	75.0%	7
7	A	23	56.1%	56.1%	2	75.0%	7

Standard reports are automatically emailed to teachers, no need to create any reports!

Our Mission:

We partner with districts to improve student performance through curriculum and assessment alignment, national research, personal relationships, world-class technology and support.
