

The p4r RTI module is a framework that promotes high quality instruction while providing a systematic and increasingly intensive academic and behavior interventions.

The p4r system provides the key components that make up an effective RTI program which are Tier I/Core Instruction, Universal screening, Progress monitoring, Tiered Interventions and Data-based decision making.

RTI Features:

- All assessment data and interventions are electronically tracked, stored and communicated among the school staff.
- Variety of reports provide quick access to the student's assessment data and interventions can be used for analysis on the effectiveness of the various interventions and curriculum.

Our Mission:

We partner with districts to improve student performance through curriculum and assessment alignment, national research, personal relationships, world-class technology and support.
